

QGIS Application - Bug report #18694

[Layout] Data-defined options not updated in items properties when moving from one item to another (of the same type)

2018-04-10 05:06 PM - Harrissou Santanna

Status:	Closed	
Priority:	Normal	
Assignee:	Nyall Dawson	
Category:	Map Composer/Printing	
Affected QGIS version:	3.1 (master)	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 26582
Description		
I think the issue of DD buttons not being reset when moving from a picture item to another picture item (#18637) applies to some other features:		
<ul style="list-style-type: none">- Attribute table: rotation, layer- label item: tested frame color, background color		
but i guess some other dd options on other items might be concerned as well (sorry to not check more!)		
using commit:4c8b1595 (latest on osgeo4w)
