

QGIS Application - Bug report #18704

No GDAL/GRASS functionality on OSX in QGIS3

2018-04-10 09:46 PM - Dewey Dunnington

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Processing/Core	
Affected QGIS version:	3.0.0	Regression?: No
Operating System:	OSX	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: up/downstream
Crashes QGIS or corrupts data:	No	Copied to github as #: 26592
Description		
<p>I cannot get the processing toolbox GDAL or GRASS functions to work in QGIS3 on OSX. The error for GDAL functions is:</p> <p>/bin/sh: gdal_translate: command not found</p> <p>The error for GRASS functions is:</p> <p>env: python3: No such file or directory</p> <p>env: python3: No such file or directory</p> <p>SAGA appears to be working properly. python3 appears to be working from the terminal, but gdal_translate does not appear to be working from the terminal.</p>

- Resolution set to up/downstream
- Status changed from Open to Closed

Current stable version of GRASS does not support Python 3 while QGIS uses Python 3. You need to wait for GRASS 7.8 which will be compatible with Python 3.
