

QGIS Application - Bug report #18733

Legend not matching map with "lock style for layers" option

2018-04-17 01:26 AM - Antoine Lafranchis

Status: Closed	
Priority: Normal	
Assignee:	
Category: Map Legend	
Affected QGIS version: 3.1(master)	Regression?: No
Operating System: Windows 10	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 26620
Description	
<p>Steps to reproduce</p> <ol style="list-style-type: none">1: Create a project with some polygons and a make a new layout.2: In the layout editor, add a map and a legend.3: Activate the "Lock layers" and "Lock style for layers" options on the map. Disable auto-update on the legend.4: Close the layout editor.5: Change the colors of some objects.6: Save the project and exit QGIS.7: Reopen QGIS, load the project and open its layout.8: The map kept the styles locked but the legend updated with the new styles. <p>I use QGIS 3.0.1 and the issue was there in version 2.18.</p> <p>Related question: Is it possible to copy the styles from a layout and paste them to an object on the map? If not should I would like to ask it as a feature request.</p>
