

QGIS Application - Feature request #18755

Embedded forms with n:m relations: delete action should ask for confirmation before actually deleting the entry

2018-04-18 05:18 PM - Andreas Neumann

Status:	Closed	Resolution: Copied to github as #: 26642
Priority:	Normal	
Assignee:	Matthias Kuhn	
Category:	Relations	
Pull Request or Patch applied:	No	
Easy fix?:	No	
Description		
<p>It would be good if the relation reference widget (in embedded form mode) could ask for confirmation, prior to deleting a referenced feature.</p> <p>Something like: "Deleting this feature would potentially also remove relations from other features - are you sure you want to remove this feature?" Yes/No (OK/Cancel).</p> <p>If technically feasible, this message could query how many features are still linked. E.g. "xx feature are still linked to the feature you want to remove"</p> <p>Reasoning: it is potentially dangerous to remove related features if it is still referenced by other features.</p>

Confirm delete when feature is still linked

when deleting a feature on an N:M relation and the feature in question is still linked to more than a single feature ask for confirmation. The user might not have been aware of that.

Fix #18755 <https://issues.qgis.org/issues/18755>
