Easy fix?:	No	**Copied to github as #:**	26664

Description

I'm doing some spatial join and it fails due to invalid geometry. In the Log panel, the message is

> *Feature (36802) has invalid geometry. Please fix the geometry or change the Processing setting to the "Ignore invalid input features" option.*

Execution failed after 2.83 seconds

It could be nice to also indicate from which layer the broken feature comes.
