QGIS Application - Feature request #18800
Enhanced filter handling

2018-04-25 12:43 AM - Patrick Dunford

Status:	Open		
Priority:	Normal		
Assignee:			
Category:	Data Provider		
Pull Request or Patch supplied:		**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	26686

Description

The following capabilities would be useful in respect of filters as I use them a lot and often with a number of layers at the same time.

  - One click enable/disable filter instead of having to go into the dialog box and remove the filter each time

  - Ability to have the filter automatically turned off when going into edit mode instead of the warning message.

  - Ability to apply a filter simultaneously to a group of layers.

Patrick, have you seen the changes introduced by https://github.com/qgis/QGIS/pulls/6057? Also, you may be interested in contributing to https://github.com/qgis/QGIS/pulls/6703...

> *Ability to have the filter automatically turned off when going into edit mode instead of the warning message*

Which warning message? How do you trigger it (file format)? Never got a message... Btw i'd be interested in your review for https://github.com/qgis/QGIS-Documentation/pulls/2569/files (you seem to be more used to that dialog than me)
