

## QGIS Application - Bug report #18803

### Flip order of lower and upper class values for graduated symbology

2018-04-25 01:14 PM - Harel Dan

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Symbology	
<b>Affected QGIS version:</b>	3.1(master)	<b>Regression?:</b> No
<b>Operating System:</b>	Windows	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> no timely feedback
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 26689
<b>Description</b>		
<p>In the graduated symbology 'Class' column, one can manually set the upper and lower range of the class. Doing so opens the 'Enter Class Bounds' window where the Upper value appears on the bottom, and Lower value appears on the top. (see image)</p> <p>It should probably be flipped so that Upper value is at the top and Lower value is at the bottom :)</p>

- Status changed from Open to Feedback

As I'd fill this dialog from top to bottom and ascendantly sorted, it makes sense to me to provide lower values before higher hence lower value at the top. Why would you like to flip them?
