### Description

Seems that addFeatures method of [[SpatialLite]] data provider don't work. I try to copy all features from shapefile to empty [[SpatialLite]] layer with help of simple plugin and have no result. Fetures don't adds.

I run same plugin but with both shapefiles and all work fine.

Tested on Windows XP Pro SP3 with QGIS 1.2.0 (qgis-dev package, versions up to 1.2.0-25) and QGIS 1.1 obtained from OSGEO4W installer .

Sample plugin with all necessary data attached. In archive there is shapefile, empty [[SpatialLite]] database and simple plugin which copied fetures from shapefile to database

### History

#### #1 - 2009-08-19 08:07 AM - Jürgen Fischer

- Resolution set to fixed

- Status changed from Open to Closed

fixed in commit:52c420b0 (SVN r11439)

Although that doesn't fix problems in your data model/plugin. You have several columns with NOT NULL constraints on them and don't assign any values. You also have a primary key column, that you don't initialize.

If you have an own primary key, you need to initialize it.
