

QGIS Application - Bug report #1885

r.mapcalc command misses apices

2009-08-19 08:14 AM - Paolo Cavallini

Status: Closed	
Priority: Low	
Assignee: Lorenzo Masini	
Category: GRASS	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 11945

Description

If we run r.mapcalc in graphic mode, then we copy the resulting command in the GRASS shell, it throws an error, eg:

```
r.mapcalc raster_sum=((raster1+raster2))
bash: syntax error near unexpected token @('
```

If we add apices, it works:

```
r.mapcalc raster_sum='((raster1+raster2))'
```

same if we remove the parentheses:

```
r.mapcalc raster_sum=raster1+raster2
```

Looks an easy fix.

History

#1 - 2010-02-10 05:24 AM - Redmine Admin

- Resolution set to fixed

- Status changed from Open to Closed

Hopefully fixed in commit:5e1c5f80 (SVN r12917).
