QGIS Application - Bug report #18875
Bad/malformed command string when launching TauDem script

2018-04-29 11:58 AM - Oki Sir

Status:	Closed			
Priority:	Normal			
Assignee:	Alexander Bruy			
Category:	Processing/Core			
Affected QGIS version:	2.14.22	**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	not reproducable	
Crashes QGIS or corrupts data:		**Copied to github as #:**	26707	

Description

When i try to launch a TauDem script, the corresponding command string is malformed (all words are splitted in single characters by a space, see attachment) so i receive "Cannot found specified path" error.

Instead if I try to launch the script from the command line, all works fine.

Thanks in advance and sorry for possible bad category coiche
