QGIS Application - Bug report #18896 "Hide deprecated CRSs" functionality not working properly in the Coordinate Reference System Selector dialog

2018-05-02 04:36 PM - Andrea Giudiceandrea

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	GUI			
Affected QGIS version: 3.0.2		Regression?:	Yes	
Operating System:		Easy fix?:	No	
Pull Request or Patch stapplied:		Resolution:		
Crashes QGIS or corru pits data:		Copied to github as #: 26728		
Description				

The "Hide deprecated CRSs" functionality in the Coordinate Reference System Selector dialog (Project Properties | CRS) doesn't work properly in conjunction with the "Filter" feature for both QGIS 3.0.2, 2.18.19 and probably also master.

If I check the "Hide deprecated CRSs" checkbox and then put a search string, e.g. "samoa", in the "Filter" field I obtain the CRSs list: [CRSs list A]

- + Geographic Coordinate Systems American Samoa 1962
- + Projected Coordinate Systems
- + Lambert Conformal Conic

American Samoa 1962 / American Samoa Lambert American Samoa 1962 / American Samoa Lambert (deprecated) American Samoa 1962 / American Samoa Lambert (deprecated)

that is wrong, because deprecated CRSs are displayed instead of hidden

and if I subsequently uncheck the "Hide deprecated CRSs" checkbox, then wrongly again additional deprecated CRSs not related with the Samoa ones are added to the list!: [CRSs list B]

- + Geographic Coordinate Systems
 - American Samoa 1962
- + Projected Coordinate Systems
- + Lambert Conformal Conic

American Samoa 1962 / American Samoa Lambert American Samoa 1962 / American Samoa Lambert (deprecated) American Samoa 1962 / American Samoa Lambert (deprecated) MGI / Austria Lambert (deprecated) Merchich / Sahara (deprecated) NAD27 / California zone VII (deprecated) NAD27 / Cuba Norte (deprecated) NAD27 / Cuba Sur (deprecated) ... and so on... If, instead, I start the search (putting for example again "samoa" in the "Filter" field) with the "Hide deprecated CRSs" checkbox unchecked, I obtain the [CRSs list A] as expected. If I subsequently check it, the two deprecated Samoa CRSs will be correctly deleted from the list, but **if I uncheck it again, the [CRSs list B] is displayed and this is wrong again**!

I think the problem is in **QgsProjectionSelectionTreeWidget Class** (src/gui/qgsprojectionselectiontreewidget.cpp) :: hideDeprecated, cbxHideDeprecated_stateChanged, leSearch_textChanged for QGIS 3.0 and in **QgsProjectionSelector Class** (src/gui/qgsprojectionselector.cpp) :: hideDeprecated, on_cbxHideDeprecated_stateChanged, on_leSearch_textChanged for QGIS 2.18.

Hope this historical research will help to fix the problem:

the "Hide deprecated CRSs" functionality was introduced by **Jürgen E. Fischer** with commit "[FEATURE] allow to hide deprecated CRSes" [1] in QGIS 1.5.0 and worked fine until QGIS 1.7.4. In QGIS 1.8.0 the projections dialog was redesigned (in a way very similar to the current one) by **Richard Duivenvoorde** and **Nathan Woodrow** (see Feature Request #4550 [2], Pull Request 66 [3], commit 36e178f [4]) but the "Hide deprecated CRSs" functionality was partially broken inadvertently and since then it doesn't work as supposed to (but it seems that no one else has noticed it).
