I have successfully installed QGIS version 3.0.2 to my Windows 7 laptop. However, when I try to open this software it comes up with a screen stating "(QGIS Crashed ...)". Below are the report details. Any help would be much appreciated as I need to use QGIS for work purposes and I have not yet been able to open the software as this pops up every time I make an attempt to do so.

#4 - 2018-08-23 07:31 PM - Giovanni Manghi

- *Category changed from QGIS Server to Build/Install*

- *Priority changed from Low to High*

Try again with the 3.2 installer after cleaning completely your past installations (registry keys included if necessary).

#5 - 2018-11-08 01:31 PM - Giovanni Manghi

Please try on QGIS 3.4.1, if the issue is still valid change the affected version, thanks.
