QGIS Application - Bug report #18921
Python Console Display of text

2018-05-07 03:06 PM - ian lenfant

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	PyQGIS Console			
Affected QGIS version:	3.0.2		**Regression?:**	Yes
Operating System:	windows 10		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	no timely feedback
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	26753

Description

The text in the python console is overlapping which makes it hard to read. I tried to resize the window, turn on, off, nothing seems to happen. Only reinstalling seems to fix it but for a limited amount of time.

that could be a font problem, have you tried to change the font from options of the python console?

Greetings,

Is there a known fix for this issue? I am experiencing it too. QGIS 3 only, 2 displays fine.

Thank you

I get the same error, as well as in the expression builder. I changed the font to simple courier and got it as well
Changed font to "8514oem" or "Fixedsys" and it seems fine (neither of these shows the TT indicator next to it)

#4 - 2018-12-27 10:15 AM - Nyall Dawson

- Status changed from Open to Feedback

This should be fixed in 3.4 - can you confirm?

#5 - 2019-01-14 11:53 PM - Nyall Dawson

- Resolution set to no timely feedback

- Status changed from Feedback to Closed
