| Affected QGIS version: | 3.0.2 | Regression?: No |
| Operating System: | linux mint sylvia | Easy fix?: No |
| Pull Request or Patch supplied: | No | Resolution: up/downstream |
| Crashes QGIS or corrupts data: | No | Copied to github as #: 26777 |

Description

when rearranging the filter order using drag and drop in the rule-based label screen, the pointer changes to the arrow with a dot and the filter freezes in mid drag as shown in screenshot. the pointer is locked across all applications. even trying to use xkill from a terminal says it cannot grab the pointer. keyboard shortcuts can eventually free you from this (alt-tab, esc, ctrl-w, etc).

History

#1 - 2018-05-14 12:42 AM - Nyall Dawson

- Resolution set to up/downstream
- Status changed from Open to Closed

Are you using wayland? Might be a qt/Wayland issue. In any case it'll be an issue in the qt libraries, not qgis.
