

QGIS Application - Bug report #18947

New Vector shape files don't display

2018-05-13 11:05 PM - Greg Ashcroft

Status:	Closed	
Priority:	Low	
Assignee:	Greg Ashcroft	
Category:	Unknown	
Affected QGIS version:	2.18.19	Regression?: No
Operating System:	Windows 10 32-bit	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 26778
Description		
<p>When I start up either Qgis 3.02 or 2.18.19 and create a new project and add a new vector layer, it doesn't appear in the large viewer. I tried loading the roads.shp and the other .shp files within the tutorial and nothing appears. It shows up on the legend but that's it.</p>

Is the layer checked in the layers panel? And what happens if you click on "zoom to layer" or "zoom full" in the View menu?

Hey

I got it working now. Had something to do with the roads.shp file. I just re-extracted that file (and the others associated with it) and it works perfectly fine now :)

Thanks
