

QGIS Application - Bug report #19003

Raster-->Tile index

2018-05-22 04:49 PM - Klaus König

Status:	Closed	
Priority:	High	
Assignee:		
Category:	GDAL Tools	
Affected QGIS version:	3.1(master)	Regression?: Yes
Operating System:	Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: no timely feedback
Crashes QGIS or corrupts data:	No	Copied to github as #: 26834
Description		
I would like to create a tile index from more than 300 tif-files via Raster>>Miscellaneous>>tile index. There is no result or only a empty gpkg-file. When I try the same in 2.18.18 with a shp-file the job is done in 3 seconds.		

History

#1 - 2018-05-24 01:34 PM - Giovanni Manghi

- Regression? changed from No to Yes
- Operating System changed from Windwos 10 to Windows 10
- Affected QGIS version changed from 3.0.3 to 3.1(master)
- Priority changed from Normal to High

Confirmed on master, the errors are like

ERROR 4: 'C:\Users\qgis\Desktop\rasters\military_maps\459_2.tif C:\Users\qgis\Desktop\rasters\military_maps\460_2.tif' does not exist in the file system, and is not recognized as a supported dataset name.

while the inputs files are indeed in that path.

#2 - 2018-05-24 09:45 PM - Nyall Dawson

- Status changed from Open to Feedback

How's the gdal command look? Can you spot the error?

#3 - 2018-11-11 04:46 AM - Jürgen Fischer

- Status changed from Feedback to Closed
- Resolution set to no timely feedback
