QGIS Application - Bug report #19005
QGIS crashes on user form with join

2018-05-23 12:29 AM - Nikolay Lebedev

Status:	Closed			
Priority:	Normal			
Assignee:	Alessandro Pasotti			
Category:	Forms			
Affected QGIS version:	3.0.3	**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	not reproducable	
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	26836	

Description

When editing a layer with a join and saving it a message comes up that "the feature has too many attributes". The feature is saved though.
If you create a users form for the layer with a join then next time you open the project and try to edit this layer (adding a new object) QGIS crashes.

History

#1 - 2018-06-04 03:53 PM - Alessandro Pasotti

- Assignee set to Alessandro Pasotti

- Status changed from Open to Feedback

Would you please attach a minimal QGIS project and data to reproduce this issue?

#2 - 2018-08-16 10:29 AM - Giovanni Manghi

- Resolution set to not reproducable

- Status changed from Feedback to Closed

Closing for lack of feedback.
