

QGIS Application - Bug report #19012

[PyQGIS Doc] Make all syntaxes obvious when a method has more than one syntax

2018-05-23 02:40 PM - Harrissou Santanna

Status: Closed	
Priority: Normal	
Assignee: Denis Rouzaud	
Category: Documentation and Help	
Affected QGIS version: 3.1(master)	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: up/downstream
Crashes QGIS or corrupts data:	Copied to github as #: 26843

Description

Go to <https://qgis.org/pyqgis/master/core/Layout/QgsLayoutExporter.html#qgis.core.QgsLayoutExporter.exportToPdf>

The exportToPdf has more than one way to call it but only the one in the grayed area (next to the name) is obvious, and when looking for a function you may miss the other alternative. This is also true for exportToImage, exportToSVG, print... (at least in this class).

Moreover, the paragraph showing the second alternative does not look sexy to read and you want to skip it (I unfortunately did it (!) for hours until I find in the github repo what I was looking for, which is not the way we want people to proceed.).

History

#1 - 2018-05-24 09:04 AM - Nyal Dawson

- Assignee changed from Yves Jacolin to Denis Rouzaud

#2 - 2018-05-24 02:07 PM - Denis Rouzaud

moved to proper tracker <https://github.com/qgis/pyqgis/issues/18>

#3 - 2018-06-08 01:42 PM - Denis Rouzaud

- Resolution set to up/downstream

- Status changed from Open to Closed
