

QGIS Application - Feature request #19030

Ability to add data from Microsoft Excel Worksheets (.xlsx) with multiple sheets into QGIS

2018-05-25 12:10 PM - Andy Whyte

Status:	Open	Resolution: Copied to github as #: 26861
Priority:	Normal	
Assignee:

Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>It would be very beneficial for me (and hopefully others) to be able to add data from .xlsx format which would give you the ability to add data from multiple sheets.</p> <p>It would also be great to be able to geo-reference each of them so it loads them as separate layers. This would ideally replicate something similar to what ArcMap does.</p>
