

QGIS Application - Bug report #19034

QGIS-Server generates empty PDF when printing from QWC2

2018-05-25 06:14 PM - Willy LE ROY

Status: Closed	
Priority: Normal	
Assignee:	
Category: QGIS Server	
Affected QGIS version: 3.0.3	Regression?: No
Operating System: Debian 9.4 Stretch LXC	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: no timely feedback
Crashes QGIS or corrupts data: No	Copied to github as #: 26865

Description

When sending a getPrint request to qgis-server, no payload is actually generated (PDF file size is 0 bytes, no matter what HTTP method is used)

Although no error is returned by qgis-server, according to its logfile :

```

REQUEST GetPrint
SERVICE WMS
SRS EPSG:2154
TEMPLATE mep
TRANSPARENT true
VERSION 1.3.0

No error/warning spotted elsewhere (syslog, apache2, etc.)

Also, the same project prints Ok using QGIS Desktop v3.0.2-Girona and the very same print template. It's also displayed ok in QWC2.

Any help would be greatly appreciated

History

#1 - 2018-09-12 07:31 AM - Tudor Bărăscu

QWC2 and QGIS Server printing work just fine (at least for me) so if you could attach a test project that would be good so someone can replicate the bug if it exists.

#2 - 2018-09-27 04:12 PM - Paul Blottiere

- Status changed from Open to Feedback

#3 - 2019-02-23 08:36 PM - Jürgen Fischer

- Resolution set to no timely feedback

- *Status changed from Feedback to Closed*

Bulk closing 82 tickets in feedback state for more than 90 days affecting an old version. Feel free to reopen if it still applies to a current version and you have more information that clarify the issue.
