#### Description

GRASS r.contour can either use a contour spacing OR, optionally, use a list of specific contour levels  
QGIS' GUI generates a "Wrong or missing parameter value: List of contour levels" error and refuses to proceed unless a list of contour levels is included, thus making it impossible to create contours at specified spacing.

- Resolution set to worksforme
- Status changed from Open to Closed

Seems fixed in master, you can specify either step and min/max levels or list of levels values. Please reopen if necessary.
