Crashes QGIS or corrupts data:		**Copied to github as #:**	26895	

Description

Enable snapping on the layer you edit

toggle to editing

Select features

Enable the move feature tool

When you hover over the feature to move, no snapping indicator is shown. However, if you click on it and move it near another feature, indicators are proposed for destination.

If the destination placement looks good but you can not trust the origin point accuracy then the tool looks a bit shaky

Associated revisions

Revision 3ef7b125 - 2018-05-31 01:30 AM - Nyall Dawson

Use a snapping indicator when picking feature to move with move tool

Fixes #19065
