

QGIS Application - Feature request #19075

Display file names when loading multiple GPX files to project

2018-05-31 09:46 PM - Carolyn Krause

Status:	Open	Resolution: Copied to github as #: 26905
Priority:	Low	
Assignee:		
Category:	GUI	
Pull Request or Patch supplied:		
Easy fix?:	Yes	
Description		
<p>When adding a GPX file to a project, a popup window asks the user to select which types of layers to add from the GPX file. When adding multiple GPX files at a time, this dialog popups up once for each file, but there's no way to tell which file the current popup is referring to.</p> <p>Is it possible to add the name of the current GPX file to the top of the popup? Like in the attached image.</p>
