QGIS Application - Bug report #19085
Unable to save shapefile to geopackage

2018-06-01 02:00 PM - Patrick Dunford

Status:	Open			
Priority:	Normal			
Assignee:				
Category:	Unknown			
Affected QGIS version:	3.0.3	**Regression?:**	No	
Operating System:	Lubuntu 18.04	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	26915	

Description

Appears to save and message received "Successfully saved vector layer to .gpkg" but the resulting file has a zero length, then flagged as invalid data source when it attempts to add back to the project.

History

#1 - 2018-06-18 12:55 PM - Johannes Kroeger

You only uploaded the .shp file (misnamed as .xz). Please upload a full working Shapefile as example (at least include the .shx, best also the .prj).

#2 - 2018-06-18 01:52 PM - Patrick Dunford

An xz file is not a misnamed shape file. it is an archive file, and if your archiver doesn't recognise it you need to find one that does.
