QGIS Application - Bug report #19090 Inability to resize columns in 'handle bad layers' dialogue box

2018-06-01 09:51 PM - Simon Dedman

Status: Open Priority: Normal

Assignee:

Category: GUI

Affected QGIS version:3.0.3Regression?:NoOperating System:Win10Easy fix?:No

Pull Request or Patch supplied: Resolution:

Crashes QGIS or corrupts data: Copied to github as #: 26920

Description

One can resize the handle bad layers box as a whole by dragging the edge, although double clicking the toolbar fills the screen vertically but not horizontally, peculiarly.

However one cannot resize the columns within the dialogue box, meaning it can be impossible to see the names of the layers. See attachment.
