

QGIS Application - Bug report #19175

Error after copying layer style

2018-06-12 11:05 AM - Stefan Rey

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Symbology	
Affected QGIS version:	3.0.3	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 27004
Description		
<p>I have a layer from a PostgreSQL DB with a specific style / classificataion in QGIS. After this, I add the same layer from another PostgreSQL DB. To have the same styling, I copy the style from the existing layer, and paste it to freshly added layer (right click to the layer, styles --> copy/paste style). So far all works fine. If I save and reopen the QGIS project, non of the layers is displayed fine, respectively the project is not opened correctly.</p> <p>pic1: layer after pasting the style, before closing the project</p> <p>pic2: layer after reopening the project</p>
