Strange,

I also have 3 different pc with qgis 1.2 installed from the same repository and I'm not hitting this problem. Did you any other previous version installed?

I previously had 1.0.2 installed - I apt-get remove'd that prior to the installation of 1.2.0, however.

Did you tried removing the ~/.qgis directory?

#6 - 2009-09-03 09:50 AM - iknowjoseph -

Yes, the application still crashes.

#7 - 2009-09-03 10:07 AM - iknowjoseph -

Fixed as per ticket 1919 - assume this can now be marked as a duplicate (or vice-versa) - still don't know why python-qgis wasn't installed as part of my original installation, however.

Thanks, Joseph
