

QGIS Application - Feature request #19193

Better display of groups in Items panel (layout mode)

2018-06-14 06:53 PM - Antoine Lafranchis

Status: Open	
Priority: Normal

Pull Request or Patch supplied:	Resolution:
Easy fix?: No	Copied to github as #: 27022
Description	
<p>In the current QGIS version (3.0.3), in layout mode, the Items list does not show which items are inside groups. It's also impossible to drag and drop items inside groups.</p> <p>I suggest to make it similar to the map layers panel, in which groups and their content are clearly displayed. Moving items inside or outside of a group with drag and drop in the list is useful too.</p>
