<b>Category:</b> Field calculator	
<b>Affected QGIS version:</b> 3.0.3	<b>Regression?:</b> No
<b>Operating System:</b> Windows	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 27066

### Description

Every time the field calculator icon is clicked, whether from the main toolbar or from the table interface, QGIS hangs (but does not crash).

This occurs on Windows (10) but not on Mac.

The problem seems to be data source independent since it happens with shapefiles and PostGIS tables.

It occurred with 3.0.1 but upgrading to 3.0.3 did not fix it.

This is a local issue - I can't reproduce on a range of windows installs (both win 7 & 10). Try with a clean profile to rule out plugin issues.
