

QGIS Application - Bug report #19288

GDAL compression parameters

2018-06-27 06:43 PM - Dmitry Kravchook

Status:	Rejected	
Priority:	Normal	
Assignee:		
Category:	Processing/GDAL	
Affected QGIS version:	3.2	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: worksforme
Crashes QGIS or corrupts data:		Copied to github as #: 27116
Description		
When in Setting\Options\GDAL\Edit Create Option (button) is pressed. Selected in dropped window option is ignored in Raster\Conversion\Translate (Convert Format)		

History

- #1 - 2018-06-29 11:18 AM - Alexander Bruy
- Resolution set to worksforme
 - Operating System deleted (Linux, Windows)
 - Status changed from Open to Closed
 - Category changed from GDAL Tools to Processing/GDAL

Works fine. You need to specify corect input raster first. BTW, this is what message in the command-line widget says.

- #2 - 2018-06-29 11:19 AM - Alexander Bruy
- Status changed from Closed to Rejected

- #3 - 2018-06-29 12:11 PM - Dmitry Kravchook
- File Gdal-error.avi added

For demonstration i didn't use any raster.
Now i captured video of problem (with raster).
