Pull Request or Patch supplied:		Resolution: wontfix
Easy fix?:	No	Copied to github as #: 27192
Description		
<p>I normally access the Layout I want through Projects > Layout, but it would be so nice to have a drop-down menu on the tool-bar, as I have plenty of space there anyway.</p> <p>Accessing through Projects menu takes longer and I don't want a Layout manager window open all the time either.</p> <p>Thanks</p>

Sounds like a good candidate for a 3rd party plugin. The trend in qgis itself is to reduce the amount of toolbars and buttons in the default install, due to complexity of the existing toolbars.
