Description

I normally access the Layout I want through Projects > Layout, but it would be so nice to have a drop-down menu on the tool-bar, as I have plenty of space there anyway.

Accessing through Projects menu takes longer and I don't want a Layout manager window open all the time either.

Thanks

Sounds like a good candidate for a 3rd party plugin. The trend in qgis itself is to reduce the amount of toolbars and buttons in the default install, due to complexity of the existing toolbars.
