

QGIS Application - Feature request #19365

Layout legend sub-layer can't be shown

2018-07-09 05:08 PM - d quintao

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Map Legend	
Pull Request or Patch supplied:		Resolution: invalid
Easy fix?:	No	Copied to github as #: 27193
Description		
<p>With the Layout Legend, when a layer is under a group you can't select that layer symbol to appear by itself, and same thing for a layer that has categorized symbols, you can't select just one symbol from the layer.</p> <p>Or am I missing something?</p>

- Resolution set to invalid
- Status changed from Open to Closed

Yes - you need to uncheck "auto update", and then remove all the categories you don't want from the list.
