

QGIS Application - Feature request #19367

Import data sources, no names for multiple files

2018-07-09 05:26 PM - d quintao

Status:	Open	Resolution: Copied to github as #: 27195
Priority:	Normal	
Assignee:		
Category:	Data Source Manager	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>When we import multiple files and are asked for the data source, Tracks or Waypoints or Routes, the window appears without the name of the file we are opening sources from.</p> <p>Fine if we open 3 or 4 files and only want tracks from all. But what if we want tracks from some, routes from some, waypoints from some, there is no filename at the window title so we might import the wrong sources attributes.</p>
