

QGIS Application - Feature request #19368

Categorize symbols of layer, no option for single colour

2018-07-09 05:31 PM - d quintao

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:		Resolution: invalid
Easy fix?:	No	Copied to github as #: 27196
Description		
<p>When we select categorize (instead of Single Symbol) there is no option for a single colour, only different colour ramps.</p> <p>Most often I use categorize so that I can exclude certain features from the canvas and I actually want all the features one colour. So I have to select all the features (Ctrl-A doesn't work??) and right-click change colour.</p> <p>I shouldn't need to change them all back to the single symbol colour because I didn't want the colour ramp in the first place!</p> <p>Thanks</p>

- Resolution set to invalid
- Status changed from Open to Closed

You need to lock the symbol layers in the "tree" part of the symbol editor.

In any case this isn't a bug, rather a qgis use question - so more appropriate for stackexchange
