

QGIS Application - Bug report #19396

Default CRS for new projects not working as expected

2018-07-11 10:51 PM - Matthew Baker

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Projection Support	
<b>Affected QGIS version:</b>	3.2	<b>Regression?:</b> No
<b>Operating System:</b>	Windows, Linux	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 27224
<b>Description</b>		
<p>In version 2.18, setting the 'Default CRS for new projects' to an 'on the fly' option enabled maps to be set to that CRS, rather than the CRS of the data added to the map.</p> <p>In version 3.2 (potentially earlier versions of 3.x), when the 'Default CRS for new projects' layer is set and a table added in another CRS (in our case from PostGIS), the map CRS changes to that of the layer, overriding the 'Default CRS for new projects' option.</p>
