

QGIS Application - Bug report #1942

Allow more decimal/integer places in the labels font size selector

2009-09-21 05:14 PM - cgsbob -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Symbology	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 12002
Description	
<p>In order to create labels on a feature in geographic CRS, you must have a font size ≥ 0.01 degrees (which is about 870 meters in one of my locations) and set the font size to Map units. This often creates very large labels.</p> <p>My solution to this problem is to reproject this data in a projected CRS. A better solution to this problem is to allow more than 2 decimal places in the Font size spinbox and other spinboxes in the Labels tab.</p>

History

#1 - 2009-10-08 08:49 AM - Giovanni Manghi

The same is true when map units are meters. In this case the problem is the opposite as it is necessary to define labels that are defined by 3 or more integers to see big enough labels when you zoom out. See #1942.

#2 - 2009-10-08 08:49 AM - Giovanni Manghi

sorry I mean #1972

#3 - 2009-10-08 09:08 AM - Jürgen Fischer

- Resolution set to fixed

- Status changed from Open to Closed

fixed in commit:afc55a1d (SVN r11773)

#4 - 2009-10-10 01:26 AM - Giovanni Manghi

Replying to [comment:3 jef]:

| *fixed in commit:afc55a1d (SVN r11773)*

Hi,

thanks for the fix.

it would be possible to disable the label preview for font sizes (in map units) > than a certain value? If by mistake (or not) a very big size is selected the dialog box become suddenly very wide and exits the limits of the screen.
