QGIS Application - Bug report #19446
Special Characters in Project-Names saved as Qgz-Files do not work /qgz as default

2018-07-19 04:02 PM - Peter Drexel

Status:	Closed			
Priority:	High			
Assignee:				
Category:	Project Loading/Saving			
Affected QGIS version:	3.2		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	duplicate
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	27274

Description

Using special characters (ie German äüö etc) in project-names saved as qgz-files lead to empty projects wenn reopended. If I extract the content of the qgz (ie ö.qgz) to to a folder (creating ö.qgs and ö.qgd) I can open the ö.qgs...

qgz vs. qgs:
I think it should be possible to choose the default-type of the project-file (qgs or qgz) in the settings as the compressed qgz-files cause problems with our virus-scanners...

Thanks
Peter

If I create a file called test.qgz in QGIS, rename it to tëst.qgz in Windows Explorer, and load that file in QGIS everything is loaded correct.

If I create a file called tëst.qgz in QGIS, rename it to test.qgz in Windows Explorer, and load that file in QGIS, no layers are loaded.
