Pull Request or Patch supplied:		**Resolution:**	not reproducable	
Crashes QGIS or corrupts data:		**Copied to github as #:**	27290	

Description

QGIS 3.2 Database Manager menu ICON mission and database manager is not available

QGIS 2.x is fine.

History

- Status changed from Open to Feedback

What platform are you running on? Are you sure the dbmanager plugin is enabled in the plugin settings?

#2 - 2018-07-23 08:19 AM - al piszcz

- File Capture.JPG added

Windows 10/64

Views->Toolbars->Database Toolbar

The menu bar expands and a blank section appears, however there is no DISK/DB ICON (BLUE) in the panel. PNG attached.

If I disable the Database Toolbar the blank section is removed.

I also tried resetting Menus by Settings->Options->Menus->Reset to Defaults. No change in behavior.

Similar steps and loading rasters from PostGIS works correctly with 2.18.

#3 - 2018-07-23 11:18 AM - Nyall Dawson

Please confirm that the plugin is enabled

#4 - 2018-08-23 12:51 AM - Giovanni Manghi

- Resolution set to not reproducable

- Status changed from Feedback to Closed

Closing for lack of feedback.
