

QGIS Application - Bug report #19465

Pressing Enter in "Label with" deletes expressions

2018-07-22 11:03 PM - Anita Graser

Status:	Closed	
Priority:	High	
Assignee:	Nathan Woodrow	
Category:	GUI	
Affected QGIS version:	3.3(master)	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 27293
Description		
It's possible (and very convenient) to edit expressions in the "Label with" input field of the labeling panel but if the user presses Enter, the expression is deleted. The user has to instead use Tab to leave the input and have the labels on the map update. (Enter does not delete the input value if it's just a regular field instead of an expression.)
