Pull Request or Patch supplied:	Yes	Resolution: invalid
Easy fix?:	No	Copied to github as #: 27321
Description		
I have a small script for testing. In Python editor it works. The script I want to add it to the toolbox "Scripts", but it isn't shown there. The script is saved in the default directory. I try it with QGIS version 3.2.0 andf 3.2.1 too. But it works with 2.18.21. What is wrong?
