

QGIS Application - Bug report #195

windows version - backspacekey problem opening grass shell

2006-07-18 01:23 PM - feurbano-tin-it -

Status: Closed	
Priority: Low	
Assignee: Redmine Admin	
Category: GRASS	
Affected QGIS version:	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied:	Resolution: invalid
Crashes QGIS or corrupts data:	Copied to github as #: 10254

Description

if i try to open the grass shell, i get the error:
impossible to find the file "-backspacekey".

in the previous 0.8 previews, i had this kind of problem when qgis was installed in a path containing an empty space (i.e., "c:\\document and settings\\temp\\").

I can't reproduce this problem.

Does it work for you in 0.8.0 Preview2 release (you have to copy msys directory from Preview1 to get GRASS shell to work)?

Hi,

i tried this other version

<http://www.holl-land.de/blog/index.php/2006/09/18/qgis-080-preview-2-for-win32-available/>

and it has no problem...

thanks

ferdi

- Resolution set to invalid

- Status changed from Open to Closed

OK - as it works for you now, I'm closing the ticket.
