

QGIS Application - Bug report #19501

Cannot save a layer definition file

2018-07-27 07:35 AM - Patrick Dunford

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Map Legend	
Affected QGIS version:	3.3(master)	Regression?: No
Operating System:	Debian 9	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 27329
Description		
<p>When you right click a layer group in the layers list the option to save as layer definition file is missing from the shortcut menu.</p> <p>If you also go to the layer menu and you can find in that menu, the option to save as a layer definition file is greyed out, although you can add from a layer definition file.</p> <p>This seems to be a changed behaviour from 2.18 when you want to save a group of layers into a layer definition file and I'm not sure why I can't do it like that anymore.</p>

- Category changed from Map Canvas to Map Legend

Maybe the change is by design, you should ask on the mailing lists.
