

QGIS Application - Feature request #19520
please turn Geodesic Measurement tool window into a QGIS Panel

2018-07-31 06:31 PM - Berteh B

Status:	Open	Resolution: Copied to github as #: 27347
Priority:	Normal	
Assignee:		
Category:	GUI	
Pull Request or Patch supplied:	Yes	
Easy fix?:	Yes	
Description		
<p>Please allow to dock the geodesic measurement tool window as a panel in the sidebar, instead of having it flying around and obstructing the map.</p> <p>The panel should then just get the focus ("jump" forward) if it is in a panel group when the measurement tool is clicked.</p> <p>That would greatly improve usability, and fix other issues such as #18924</p>
