QGIS Application - Bug report #1955
QGis segfaults unless I am root

2009-09-28 04:18 PM - rnolde -

Status:	Closed			
Priority:	Low			
Assignee:	nobody -			
Category:	Build/Install			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Fedora	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	invalid	
Crashes QGIS or corrupts data:		**Copied to github as #:**	12015	

Description

QGis Stable(qgis-1.0.2-1.fc11.i586) on Fedora 11 with Grass 6.3.0-12.fc11.i586 will run as root but segfaults at startup with a normal user login. If I startup Grass separately, I get the following message:
Starting GRASS ...
/usr/lib/python2.6/site-packages/wx-2.8-gtk2-unicode/wx/_core.py:14450: [[UserWarning]]: wxPython/wxWidgets release number mismatch
  warnings.warn("wxPython/wxWidgets release number mismatch")

I've rebuilt QGis from the src RPM with no change. I have run strace qgis and captured the output to see what files are being opened by qgis before it crashes.

History

#1 - 2009-10-03 12:00 AM - Paolo Cavallini

- Resolution set to invalid

- Status changed from Open to Closed

This should be related to your GRASS version (too old) - please try with a grass64. Thanks.
