

QGIS Application - Bug report #19567

qgz files not load

2018-08-08 12:11 PM - Evgeniy Z

Status:	Closed		
Priority:	High		
Assignee:	Nyall Dawson		
Category:	Project Loading/Saving		
Affected QGIS version:	3.2.1	Regression?:	No
Operating System:	Windows 10 x64, Windows 7 x64	Easy fix?:	No
Pull Request or Patch supplied:	No	Resolution:	
Crashes QGIS or corrupts data:	No	Copied to github as #:	27394
Description			
I try to open *.qgz files from explorer or from qgis-bin but QGIS load empty project. After unzip qgz I try to open *.qgs - works fine.

Use QFile to write zip contents, instead of std::ofstream

Because std::ostream doesn't handle non-ascii paths

- Assignee set to Paul Blottiere

I think this deserves to be fixed in the bugfix run. I affect this to Paul. Please notify here if someone objects or takes lead here

#4 - 2018-09-21 12:12 PM - Evgeniy Z

My current version 3.2.3

If I save qgZ-project with Cyrillic symbols in filename, this project will not open.

It seems qgZ-project without Cyrillic symbols in filename opens normal.

#5 - 2018-11-20 01:37 PM - Jörn Gutzeit

I can not open *.qgZ files as user "Jörn" > see #20562 > maybe any relations?

#6 - 2018-11-21 04:44 PM - Jürgen Fischer

- Related to Bug report #20562: all layers gone when reopen *.qgZ as User „Jörn“ added

#7 - 2018-11-26 10:46 AM - Jérôme Guélat

This is still happening with QGIS 3.4.1 when you use letters with accents like é, è, ä, ö, etc. in the filename.

This gives the impression that the QGIS project is corrupted if people don't know that they can unzip it.

#8 - 2019-01-22 12:21 AM - Niall Dawson
