| Description | | |
| <p>I use Josm for OpenSteetMap editing and I find two mouse behaviour very useful:</p> <ul style="list-style-type: none">- Use the right-click and drag to pan the map- When zooming with the mouse wheel, keep the map point under the mouse pointer fixed <p>This allow to pan and zoom the map quickly, using just the mouse without swtiching tool.</p> <p>I think that it is very useful and it does not conflict with current behaviour.</p> | | |

History

#1 - 2009-12-13 08:43 AM - Steven Mizuno

Instead of right-click/drag there is Middle button panning available, although I believe it is not documented. There is also using the space bar to pan without switching tools, as described in the User Guide. The keyboard - arrows and pgup, pgdn for move and zoom - can be used as well.

The mouse behavior described is already available (Settings>Options, Map Tools tab)

#2 - 2009-12-27 08:45 AM - Paolo Cavallini

- Resolution set to fixed
- Status changed from Open to Closed

AFAICT, this can be closed - feel free to reopen it if necessary
