Description	
<p>Hi all,</p> <p>I want to ask why my qGIS 3.2 won't open and it constantly showed me this window (attached).</p> <p>I have tried to open via batch file but the problem persists.</p> <p>Is there anything I can do? Because I already did the clean-uninstall and re-install several times without getting any results.</p> <p>Thank you.</p>
