

QGIS Application - Feature request #19608

Avoid adding processing model output to layer list

2018-08-13 01:37 PM - Magnus Nilsson

Status: Closed	
Priority: Normal	
Assignee:	
Category: Processing/Modeller	
Pull Request or Patch supplied:	Resolution: invalid
Easy fix?: No	Copied to github as #: 27435
Description	
In some cases, I would like a processing model to create an output file (such as GeoPackage), without also adding it to the layer list in the main window. I don't see an option like "Add processing model output to layer list" and I think that is a missing feature.

Models, as all other Processing algorithms, add outputs to the layer tree by default. But under each output there is a checkbox "Add result to canvas" to control this behaviour. Just uncheck it if you don't want to add specific result to the canvas.
