Description

Hi all,

On the qgis 1.4.0 trunk (windows Vista).

I see the option to save project with relative path don't work with a spatialite layer.

Opening the .qgs file I notice it still have the absolute path.

History

#1 - 2009-10-07 09:55 AM - Jürgen Fischer

- Resolution set to fixed

- Status changed from Open to Closed

should be fixed in commit:4ed28f36 (SVN r11763)
